

DECISION TREE #3: POTENTIAL COVID-19 SYMPTOMS FOR STUDENTS/STAFF IN K-12, PRE-SCHOOLS & CHILD CARE SETTING

Low-risk: general symptoms

- Fever (≥100.4°F)
- Cough
- Congestion/Runny Nose
- Sore Throat
- Nausea/Vomiting/Diarrhea
- Headache
- Fatigue/Muscle or Body Aches

High-risk: red flag symptoms

- Difficulty Breathing
- Loss of Taste/Smell
- New Onset of Confusion
- Excessive Sleepiness or Inability to Stay Awake

* A close contact of a potentially infected person is a person who was in close contact in the last 2 days (more than 15 minutes over a 24-hour period within 0-6 feet) with a potentially infected person or had direct contact with bodily fluids/secretions from a potentially infected person.

** Completed Isolation for Positive COVID-19 Case: at least 24 hours have passed since resolution of fever without the use of fever-reducing medications; and other symptoms have improved; and at least 10 days have passed since symptom onset.

*** Improvement of Symptoms: At least 24 hours have passed since resolution of fever without the use of fever-reducing medications; and other symptoms have improved.

**** This option only applies to conditions previously diagnosed and documented by healthcare providers and when symptoms are mild. More severe symptoms should be treated as illness and the student sent home.

***** Repeat antigen testing and/or confirmatory molecular testing should be considered in individuals who receive a negative result with an antigen test but have symptoms specific for COVID-19 (such as loss of taste and smell).
